

## What application is best for you?

**APTRA is the brand name applied to the portfolio of financial software solutions offered by NCR, designed to offer new levels of self service flexibility and functionality.**

APTRA Advance NDC (AANDC) is Windows based ATM application targeted for customers currently running, or familiar with, NCR's OS/2 NDC application. AANDC supports standard ATM transactions in a mainframe (states-n-screens) text looking environment over dial-up, lease line, or TCP/IP communications. AANDC also provides improved fault clearing functions in Supervisor mode.

APTRA Edge is a highly flexible client-server self-service application designed for use in any host environment to provide a modern GUI user interface. APTRA Edge is an open solution based on Microsoft Windows, XFS standards, and TCP/IP communications. APTRA Edge also provides options to add more advanced functionality such as; intelligent cash and check deposit, ATM personalization, consumer preferences, and more.

## Improve your brand image with NCR APTRA Software, Custom Marketing Screens & Color LCD Monitors

### CRT Monitor with OS/2 Software and text based menus

- ✓ Smaller CRT Displays
  - Monochrome in color
  - Difficult to read
- ✓ Text based menus
